About Me

Hello, I am Damla, an Industrial Design graduate from Istanbul Medipol University with a double major in Interior Architecture and Environmental Design. I specialize in UX/UI design, focusing on user research, wireframing, prototyping, and usability. I design intuitive, user-centered digital experiences by combining strong problem-solving and critical thinking skills. Currently, I am working on mobile application design projects as an UX/UI Designer.

Experience

UX/UI Designer

Fenix Mobile Yazılım Feb 2025 – Currently

Designed responsive mobile and web interfaces with a focus on usability and user experience.
Created user flows, wireframes, and prototypes based on user research.
Developed design systems and UI components for consistency.
Collaborated with cross-functional teams including developers and product managers in Agile workflows.
Conducted usability testing and improved designs based on feedback.

Interior Architecture Intern

Özbir Yapı (Tunapark Ataşehir) Jul 2024 – Aug 2024

Assisted in quantity surveying and cost estimation to support accurate budgeting and resource planning.
Supervised on-site finishing works, ensuring compliance with design specifications and quality standards.
Conducted site inspections and monitored construction progress to identify and resolve issues.
Coordinated communication between architects, engineers, and contractors across multiple disciplines.
Contributed to project process management by supporting the implementation of construction workflows.

Industrial Design Intern

UKINOX Aug 2022 – Sep 2022

Created 3D models and high-quality renderings of kitchen appliances for product visualization.
Designed 2D marketing materials including price catalogs, brochures, and campaign assets.
Contributed to sales website design by preparing visual content and product layouts.
Added product visuals and descriptions to the website, optimizing content for SEO.
Learned and supported stand design and production processes for product exhibitions.

Education
